noteinterviewer	<p>Notes for interviewer</p> <ul style="list-style-type: none"> • Definition of household: A household is a group of persons who usually live under the same roof, share food from a common source, and contribute or share in a common resource pool. • Criteria for household selection: This is a survey of farmers and agricultural workers. A household is eligible if at least one adult member's primary occupation is agriculture. • Only 1 person per household should be surveyed. This can be (i) a person who owns/leases agricultural land and is mainly responsible for making decisions about cultivation, OR (ii) a person whose primary occupation is agricultural labor on other people's land. • DO NOT interview a person who is not involved in agriculture. • DO NOT interview the respondent in a public place where other people are around. This is important to ensure that respondents' answers are not influenced by other people • DO NOT read the answer options out aloud, unless "READ OUT ALOUD" is specified.

Field	Question	Answer
noleconsent	<p>Consent</p> <p>We invite you to take part in this study because you are engaged in agriculture. This study is being done to understand how welfare policies and programs affect the economic circumstances of people involved in agriculture, as well as the social relationships of the village. This is important to understand because, as you know, most people in India live in villages and rely on agriculture for their livelihood.</p> <p>I would like to ask you some questions about your household income, agriculture, borrowings, benefits from government schemes, interactions with others in the village, as well as your views on social and political issues. Your participation will take no more than 35 minutes of your time. Your participation is completely voluntary. You can skip any questions that you do not want to answer. You can stop this survey at any time. You can also ask me any questions that you have about the study.</p> <p>We are approaching thousands of households across many villages in Telangana and Andhra Pradesh to participate in this study. Your answers will be combined with the answers of other people in Telangana and Andhra Pradesh, and only overall results will be used for research. They will be coded and stored on a secure server only accessible to the researchers. There does remain a risk that someone else could access your data. We will do our best to protect the information you share with us but cannot reduce this risk to zero. Please also note that parts of the survey may be audio recorded for internal quality control purposes. These recordings will be deleted as soon as quality checks are complete.</p> <p>There will be no direct benefits to you from participating in this study. Your participation may indirectly benefit others through any conclusions reached by the study on how people engaged in agriculture can be better supported. If you participate in this study and complete the survey, we will enter your name in a lottery, where you will have a chance to win Rs. 1,000. If you win this amount, we will inform you by phone call within 2 months.</p> <p>If you have questions, concerns, or complaints, please contact [supervisor name], an employee of [survey firm name], at [insert number]. You can also contact Akshay Dixit, a researcher at Harvard University, at akshay_dixit@g.harvard.edu. This research has been reviewed and approved by the Harvard University Area Institutional Review Board ("IRB"). The Institutional Review Board is a group of people who review research studies for the safety and protection of the people who take part in the studies. You may contact them at cuhs@harvard.edu if your questions are not being answered by the research team, you have questions about the study and your rights as a study participant, or if you cannot reach the research team.</p> <p><i>Question relevant when: \${eligible} =1</i></p>
